Subject: Application for Internship / Entry-Level Position in Computer Science / Software Engineering

Dear Hiring Manager,

I am writing to express my interest in an internship or entry-level opportunity at your organization. I am a motivated **Computer Science Engineering undergraduate** currently pursuing my B.Tech from **Sushila Devi Bansal College, BGI Indore**, with a strong foundation in **C, C++, Java, Python, Web Development, and Cybersecurity fundamentals**.

Through my academic journey and hands-on projects, I have developed strong **problem-solving skills** and a keen interest in building **secure, efficient, and scalable applications**. I have worked on multiple projects such as a **Car Racing Game using C++**, where I implemented gameplay logic and strengthened my understanding of object-oriented programming and debugging. I also developed **CyberShield Pro**, a cybersecurity-focused project aimed at improving system security through secure authentication, access control, and data protection while applying core cybersecurity principles like the **CIA triad**.

Additionally, I designed and developed a **College Resource Website**, a full-stack project that simplifies the sharing of academic materials between students and teachers. This project provided me with practical exposure to **HTML, CSS, JavaScript, backend development, databases, authentication workflows, and real-world problem solving**.

I am eager to apply my technical skills, adaptability, and willingness to learn in a professional environment where I can contribute meaningfully to projects while gaining industry experience. I am confident that my dedication, technical knowledge, and continuous learning mindset would make me a valuable addition to your team.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and enthusiasm align with your organization's goals.

Yours sincerely,
Ansh Agarwal
